The risk indicator is based on the assumption that you keep the product over the recommended investment period. The data used to calculate the synthetic indicator may not be a reliable indication of the future risk profile of your product. It is not certain that the risk category will remain unchanged, and the classification of the product may therefore change over time. The risk factors are described in full in the Prospectus.

INVESTMENT OBJECTIVE AND POLICY

The Fund promotes ESG characteristics pursuant to article 8 of the SFDR. The Fund seeks to maximize return in line with money market rates and to preserve the value of the investment ensuring its underlying assets can easily be bought or sold in the market.

The objective of the Fund is to provide a level of day-to-day liquidity, preserve the invested capital while producing the best possible money market return for the investor and to outperform its benchmark/reference index, minus fees. To achieve that objective, the Fund intends to invest only in instruments paying lower yields but being relatively safe on the short term. The Fund may also use eligible financial derivative instruments.

Eligible securities are identified based on a proprietary responsible investment process and the Investment Manager will simultaneously be applying Environmental, Social and Governance (ESG) criteria process on an ongoing basis to select securities covering at least 70% of the Fund's portfolio on an ongoing basis and provided that the issuers follow good corporate governance practices.
